Jul 16, 2013 Advisory- NY/NJ Port Congestion

Due to circumstances beyond our control, delays are occurring as a result of a significant amount of congestion in the NY and NJ ports. Please be reassured that we are doing all we can to move your cargo in a timely manner. However, at this time delays are to be expected as this is an overall portwide issue that cannot be avoided. Further information about the current situation at the ports is available from the Journal of Commerce, or contact your local Agent (In Greece is Eurogroup).
